Benzocaine Cream Brand In India

Benzocaine is a commonly used local anesthetic. It works by blocking signals from nerves to muscles, so you do not feel pain. Benzocaine is used to relieve pain from minor burns, scrapes, insect bites, sting, cuts, and abrasions. It may also be used as a topical anesthetic for temporary relief of the pain of toothache and dental procedures. It is also used to treat earwax.

Benzocaine cream or solution inside the condom de-sensitises the male sexual organ to help delay ejaculation and prolong erection during intercourse. Though a condom is not a drug & will not
